

Securitas Group Emissions Policy

Our objectives

- In all of our operations, we strive to continually reduce the impact on climate, focusing primarily on the energy and transport areas.
- In all of our operations, we avoid to use environmentally harmful substances but strive to exchange those for environmentally friendly substances, even if the cost is higher for the company.
- In all of our operations, we shall contribute to recycling and ensure that the handling of waste is performed in a safe and environmentally compatible manner.

Page 1 of 2

A basic requirement is that we act within the framework of laws and international conventions. We respect and comply with environmental legislation, agreements and safety requirements, or other provisions that set the parameters for our operation.

We conform to or surpass the requirements of national or international regulations or agreements concerning the reduction of emissions and discharges to air, land and water.

Company cars

A **Company car** is a car, aimed for maximum five persons, paid for by Securitas and used either as a:

- Necessity car, ie a working tool in order to fulfil the job used by Securitas employees
- Benefit car, ie a car provided by Securitas to a manager or specialist, and either paid for by Securitas or by the employee in any format

A **Minivan** is a Minivan, aimed for six or seven persons, paid for by Securitas and used either as a:

- Necessity car, ie a working tool in order to fulfil the job used by Securitas employees
- Benefit car, ie a car provided by Securitas to a manager or specialist, and either paid for by Securitas or by the employee in any format

Trucks, buses and specialist vehicles such as cash handling transport vehicles are not defined as Company cars or Minivans.

Cars or minivans owned by the employee and Securitas reimburses the employee in any way for using his or her car at work, are not defined as Company cars.

Our goal is to reduce emissions caused by Securitas Company cars and our aim is that all new cars purchased or leased (operationally or financially), every year shall emit on average less grams CO₂ per km than all new Company cars purchased or leased the year before.

It is every country manager's responsibility to decide on the national company car policy in such a way that cars and minivans with the lowest possible emissions of CO2 per km are given priority.

Securitas will annually, in November (as of October 31st), ask all country managers to report the total number of Company cars and the average g CO2 per km that all those cars emit. This number and its development will be monitored and published, and shared within the Securitas Group.

As of December 1, 2012, no new Company cars are allowed to be purchased or leased that emit more than 150 g CO2 per kilometre.

As of December 1, 2012, no new Minivans are allowed to be purchased or leased that emit more than 200 g CO2 per kilometre.

November, 2012

Alf Göransson
President and CEO, Securitas AB
